

ACCOLADES
for Ronelle Coburn, author of
DESTINY AT YOUR FINGERTIPS:

Discover the Inner Purpose of Your Life and What It Takes to Live It

Accolades For Ronelle Coburn and LifePrints Fingerprint Analysis

"Ronelle has a wonderful ability to identify your strengths. Read this book and learn how to live life leading with your strengths!" Machen MacDonald, #1 bestselling author, *The Power of Coaching*

"Learning my life purpose gave me the boost I needed to finish two books and put myself out there. Just what I needed at the perfect time." Susanna McMahon, Ph.D. Clinical Psychologist & Author

"I've seen Ronelle several times and each visit is like a decade of therapy in terms of the insight and direction I leave with." -Kris King, Livingston, Montana, Nonprofit worker and writer

"Ronelle helped me at a very transformative time in my life. The information was RIGHT on in helping me to clearly see my life purpose and the things that get in the way of achieving it and made my path crystal clear. It is amazing how much is held in your fingerprints and Ronelle is a master translator. This book will be revolutionary if you have the courage to know what it will reveal about you and your life." Micki Grimland, LCSW, Owner and Chief Psychotherapist of Southwest Psychotherapy Associates, Houston, TX

"Your fingerprint analysis confirmed some things that I had already known to be true about myself, and allowed me to access information about things I didn't know. I cannot express to you the power of change that has come over me since being armed with this more detailed information. I thank you from the bottom of my heart for helping me get a better understanding of myself." Greg Jeffers

"I had my fingerprints analyzed more out of curiosity than anything else. I knew I was on the right career path and thought I knew my calling. However, my fingerprints showed that I should be following a childhood dream I'd discounted: to be a Leader through Public Speaking. When Ronelle told me that, I couldn't stop smiling and even laughing. Without her analysis I might have realized that by myself, but maybe not. I'm happy she helped me find this out now, so I can start working towards my dream with conviction and clarity. Thanks so much!"
Melina Kunifas, www.coachingconfidence.com

"I am deeply impressed with the hand analysis I recently received from Ronelle. I was somewhat skeptical originally. However, Ronelle's intuitive abilities, sophisticated understanding of psychological issues, and contemporary understanding of hands allowed her to immediately identify many of my personality structures and self-defeating patterns. Over the course of the session, Ronelle used humor and compassion to give me new insight and understanding of many deep personal issues. I would recommend a session with Ronelle for anyone seriously interested in a powerful tool for self-exploration and change." Tim Lajoie, Art Director, Electronic Arts

"After three years of futile attempts to raise money for an Attention Deficit Disorder training DVD where I would be the interviewer, my session with Ronelle revealed I was supposed to be the star of my own show. Shortly afterwards I had a "eureka" moment and decided to produce a low-cost DVD where I was the presenter. I produced it in one day, and it has opened the door to many more opportunities for speaking and teaching others about how to live with ADD. I was even on NBC TV last week! Learning what is in my fingerprints has helped me reach more people more easily and it's been a lot more fun too!" Victoria Ball, ADD Career Coach

"Our session together was very helpful. Based on the analysis I am a woman of wisdom who needs to be in the spotlight sharing my wisdom, but need to work with my fear of rejection, I have been able to focus on 'owning' and enjoying my presence and position in the classroom, much to the benefit of all involved. Both my students and I are having a richer experience due to the increased confidence I am projecting!" Jodi Hahn, ESL Teacher
